Technical Description of the Resort

The Myler Ski Resort is located 62 kilometers from Zvartnots International Airport, allowing visitors to reach the resort in 1 hour by car. The resort occupies an area of about 2070 hectares, of which 600 are designated for development.

In the 2024/2025 season, two additional 10-seater gondola lifts, Angeline 1 and Angeline 2, will operate in Myler, allowing guests to ascend from the starting point of the resort to its highest peak at 2850 meters. From there, a breathtaking view opens up toward the Mount Ararat, Ara, Aragats, and Hatis mountains. Currently the ski slopes are about 21 kilometers, but will eventually have 102 kilometers of high-quality, groomed ski slopes corresponding to all four levels of difficulty, color-coded according to European standards. The total lift capacity will be 41,400 people per hour, and the slopes will be able to accommodate 17,000 skiers simultaneously.

The Myler Ski Resort is transforming from a dream into the most ambitious project in the Republic, thanks to a dedicated team and professional experts from various countries. The project was developed and designed by the Canadian company ECOSIGN, and today, Myler is collaborating with companies such as Doppelmayr, Demaclenko, PistenBully, Axess, Rossignol, Fisher, Head, and other leading companies in the market. Overall, it is planned to install 17 ski lifts at the resort.
